

# Bi-Level Foot

## For 9mm Maximum Stitch Width Models

This foot enables sewing at a constant width from the fold of the fabric. It guides your top stitching and edge stitching perfectly. Thick materials (e.g. wool, denim, tweed) can be finished beautifully. It's also the perfect tool for bag making, which can have several thick seams to work with.

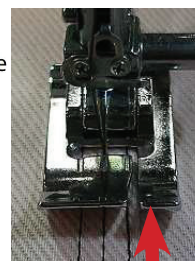

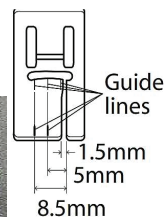

Available for 9mm Maximum Stitch Width Models.

### Easy-to-Use Foot with guide and guidelines

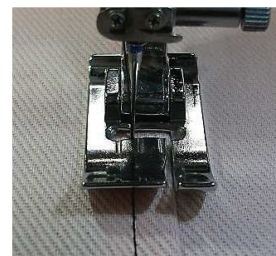

By aligning the needle drop position with any of the 3 guidelines, it is possible to sew 1.5, 5.0 or 8.5 mm from the edge of the fold.

Back side of the foot

### Sew in All Needle Positions

This foot has a wide needle drop hole (the same size as the standard foot) and supports needle positions from 0.0 to 9.0, so you can sew with your favorite needle position.

### Can be Used with Decorative Stitches

You can also enjoy creating many pieces of work with decorative stitches. It's recommended that you always perform this on a scrap piece first.
