INNER CURVES OF THE MATERIAL CAN BE SEWN BEAUTIFULLY

The distance between the knife and the needle is 9.95 mm, that is the industry's smallest level of the knife-to-needle distance.

MICRO-LIFTER

When using the micro lifter, it is possible to carry out sewing with the presser foot lifted up to 2.5mm. Elastic materials and delicate materials can be sewn beautifully with the presser foot lifted slightly.

EASY ROLL HEMMING

Thread tension that is suitable for roll hemming can be obtained only by lifting the roll hemming thread tension lever.

ADJUSTABLE DIFFERENTIAL FEED

Even with easily stretched fabrics such as knits and georgette, create beautifully sewn finishes by adjusting the differential feed. Adjustments can even be made while sewing.

KNEE LIFTING LEVER

The presser foot can be moved up and down without using your hands. The presser foot can be lifted to 6 mm at the maximum to ensure easy placement and removal of the material. The maximum height of the presser foot with the hand lifter is 8 mm.

MAGNETIC NEEDLE TRAY

This tray is useful as a place to temporarily put a needle when changing over the sewing method from 2-needle sewing to 1-needle sewing, or when changing the needle. (Two locations; on the right and left sides of the machine head)

WIDE THROAT AREA

The height of the throat is 68mm. Due to this height, the usability of the workspace improved infinitely.

QUIET OPERATION

The sound reducing design minimizes the operating noise and the unit sews with less vibration.

2/3 THREAD CONVERSION

Switch to 2-thread sewing simply by pushing the 2-/3-thread changeover attachment to the left, making this operation even easier.

TWEAK WIDTH ADJUSTMENT *JUKI EXCLUSIVE

This sewing machine is provided with the patented TWA mechanism. With the TWA, it is possible to easily correct an excess thread and fabric curling during overcasting.

WASTE COLLECTOR

Provided as a standard accessory, the waste collector catches cut-off fabric and is useful for keeping the area tidy.

EASY AND FAST THREADING

Using the easy threader feature, easily thread the machine from the threading hole to the looper with the power of a strong whoosh of air sent from the electric motor.

This amazing function makes it fast and easy when threading the upper and lower looper.
