

BROTHER LUMINAIRE INNOV-IS XP3

BUILT-IN PROJECTOR

Use the projector to beam guidelines directly onto your fabric.

LARGEST BROTHER EMBROIDERY FRAME

Make your projects larger than life with the 408 x 272mm (16 x 10.7"). To ensure your project doesn't slip and is held tightly for the duration of embroidering, Brothers largest frame comes an ergonomical spring lever release mechanism and features rubber plates on both sides of the inner frame.

HYPER WIDE-VIEW CAMERA

With a hyper-wide camera view you can project whole patterns onto your fabric, so you know exactly where and what you're stitching.

CAMERA DETECTING BUTTONHOLE FUNCTION

Take the hard work out of buttonholes! The camera assisted buttonhole foot recognises the size of your button and automatically determines the correct sewing size. The clever lever-less system ensures there's no risk of thick fabric like fleece being caught and distorting.

ARTSPIRA APP

Use the [Artspira](#) app to draw your own simple embroidery patterns and transfer wirelessly to your machine. [Artspira](#) gives you instant access to exclusive Brother projects and patterns each month. Explore, image, create.
